What is a Cookie?

Cookies are a feature of web browser (Internet Explorer, Netscape Navigator, etc.) software that allows web servers to recognize the computer used to access a website. They are small pieces of data that are stored by a user’s web browser on one website to simplify subsequent interactions with that website by the same user or to use the information to streamline the user’s transaction on related web pages. This makes it easier for a user to move from website to website and to complete transactions over the Internet. Cookies should make your online experience easier and more personalized.

Sharing Information with the Government or As Otherwise Required by Law

We may be required by law or government agency to disclose both Active and Passive Information you have provided to artsofthepamlico.org and will do so if required by law or subpoena, or for enforcement of or claims regarding our purchase agreement license.

How Can You Choose Not to Receive Information from Us or to Correct, Delete, or Access Your Information?

If you desire not to receive information from artsofthepamlico.org or if you wish to access, delete, or correct your information, regarding your transaction purchases on-line, please send an email to info@artsofthepamlico.org.

Credit Card Purchases

We secure the use of your credit card using secure sockets layering (SSL), a protocol developed by Netscape for transmitting private information via the Internet. SSL works by using a public key to encrypt* data that is transferred over the SSL connection. Both Netscape Navigator and Internet Explorer support SSL, and many websites use the protocol to obtain confidential user information, such as credit card numbers. This protocol is approved by the Internet Engineering Taskforce as a standard.

*Encryption is the translation of data into a secret code and is one of the most effective ways to achieve data security. To read an encrypted file, you must have access to a secret key or password that enables you to decrypt it. Unencrypted data is called plain text; encrypted data is referred to as cipher text. By using your credit card for your purchase, you agree to pay the amount charged for that purchase, you agree that you are over 18, and you agree to provide truthful information regarding the card and your name and information.
